Summary

Saya adalah seorang INFP menurut MBTI. Meskipun tergolong introvert, saya berpikiran terbuka dan mampu beradaptasi di lingkungan baru melalui skill interpersonal yang saya miliki. Intuitif, kreatif dan loyal merupakan kelebihan pribadi saya. Dengan rekam jejak yang telah terbukti pada perusahaan sebelumnya saya mampu mengembangkan aplikasi berbasis web yang handal dan mumpuni, unggul sebagai individu dan kerjasama tim serta mampu mempertahankan kualitas pada proyek yang dikerjakan melalui pendekatan best practice dalam mengembangkan sistem.

Summary

I am an INFP according to the MBTI. Although I am introverted, I am open-minded and able to adapt to new environments through my interpersonal skills. Intuitive, creative, and loyal are my personal strengths. With a proven track record at my previous company, I am able to develop reliable and capable web-based applications, excel as an individual and in team collaboration, and maintain the quality of projects I work on through a best practice approach to system development.

Skills

- | | | |
|-------------------------|-----------------|------------------------------|
| - Version Control (Git) | - Python | - Teamwork and Collaboration |
| - Go Language | - Docker | - SQL and NoSQL Database |
| - Javascript/Typescript | - Gitlab Runner | - Microservices Architecture |
| - PHP | - Laravel | - Codeigniter |
| - Node.js | - GNU/Linux | - API Design and Development |

Work History

- 08/2024 - 02/2025

Fullstack Engineer (Fulltime)

PT. Infini Kreasi Nusantara – Kota Tangerang, Banten, Indonesia

 - Perform maintenance and feature development on the PTSP BMKG system based on PHP using CodeIgniter and MySQL.
 - Perform maintenance and feature development on the Opini Ombudsman application based on Node.js and PostgreSQL.
 - Design and develop the Story Map feature for the SIPRO application of the Ministry of Public Works, based on PHP and MySQL
- 12/2022 - 12/2023

Backend Engineer

PT. Rumah Logic Teknologi – Tangerang, Banten, Indonesia (Remote)

 - Designed and built a web-based video management application using Go, Postgres, and FFmpeg.
 - Designed and developed a video format conversion feature into HLS format for multi-resolution support.
 - Designed and built a web-based dashboard application using Go, MongoDB, and Postgres based on microservices with an API Gateway.
 - Developed a scheduler and concurrent request feature for integrating external APIs into the dashboard system using Goroutine.

- Implemented CI/CD using Docker and Gitlab Runner at various stages such as dev, beta, and production.
- Conducted code reviews and implemented unit tests.

01/2021 - 12/2022

Fullstack Engineer
PT. Bayanaka Destina Nusantara – Yogyakarta, Indonesia (Remote)

- Maintained, bug-fixed, and added features to existing systems.
- Effectively communicated verbally and in writing with colleagues and superiors.
- Designed and built company products for web and desktop using Typescript, Express, MongoDB, Socket.io, Vue, and Electron.
- Implemented clean and reusable code/components.
- Ensured code/program functionality using unit tests.
- Implemented Bitbucket CI/CD.

01/2020 - 03/2020

Web Developer (Internship)
Kantor Bupati Kabupaten Sinjai – Sinjai, Sulawesi Selatan, Indonesia

- Designed and built a web-based Sinjai Regent's Agenda application using Vue and Firebase, accessible across various platforms.
- Collaborated with the Protocol and Communication department in developing the application.
- Implemented client-side technologies and PWA (Progressive Web App) capabilities.

Education

02/2024

Bachelor of Informatics
Universita Dipa Makassar – Makassar, Indonesia

- Thesis Title: Interface Design of Mobile Version Of The Talent Pooling Application At PT. Alani Inovasi Bangsa Using Design Thinking Method
- GPA 3,73
